

BECOME A SPONSOR!

Join us for the climate and clean energy event of the year

For the past thirteen years, Washington's and Oregon's influential political figures, business and environmental leaders, and philanthropists, have come together for Climate Solutions Annual Spring Event.

Climate Solutions' virtual event is a prime opportunity for sponsors to showcase their commitment to instituting environmentally responsible practices and building the foundations for a sustainable, carbon-free prosperity in the Northwest in front of leaders in the climate and clean energy movement. We anticipate attracting over 500 people including policymakers, business executives, and community leaders.

See sponsor levels and benefits on the second page.

WHAT CLIMATE AND CLEAN ENERGY LEADERS ARE SAYING

Climate Solutions champions bold policies and innovative market solutions to protect families, businesses, and our way of life from the threat of climate change. Thank you for creating clean energy strategies to keep the Pacific Northwest healthy and prosperous!

**- TOM KELLY
PRESIDENT, NEIL KELLY COMPANY**

MARKETING AUDIENCE

If you don't think clean energy is winning in the United States of America, you are wrong. Because it's not about regulation, it's about investment... it's about young people who care about the world they live in, who demand a more equitable world, who care about social justice, and all of us who care about our pocketbooks. That's why clean energy is winning today.

**- GINA MCCARTHY
FORMER EPA ADMINISTRATOR**

ABOUT CLIMATE SOLUTIONS

For almost 25 years, Climate Solutions has accelerated solutions to the climate crisis, starting with the premise of scaling up our success here in the region for greater global impact. We have established a long history of developing powerful partnerships and bridging divides with a diverse set of impacted and powerful constituencies. We work beyond the base, towards the broader power and alignment needed to pass groundbreaking policies and to shift the conversation to opportunities for large scale solutions to the climate crisis. Climate Solutions will now help lead an ambitious vision. The Northwest will be first region to transition to 100% clean energy and will transform our transportation system to be affordable, accessible, efficient, and clean. To succeed, we not only need an energized and tenacious movement, but also one that is broader and more deeply committed to equitable and meaningful engagement to create lasting social change. www.climatesolutions.org
